PROFESSIONAL SUMMARY

Aspiring Data Scientist / Junior Python Developer with hands-on experience building end-to-end machine learning, data visualization, and desktop applications. Skilled in Python, SQL, and Power BI, with a track record of delivering three fully functional portfolio projects spanning predictive modeling, business intelligence dashboards, and GUI-based software systems. Seeking a remote fresher role to apply strong problem-solving and data-driven decision-making skills.

TECHNICAL SKILLS

Programming: Python, SQL

Machine Learning: Regression, Classification, Clustering

Data Visualization: Power BI, Matplotlib

Libraries & Tools: Pandas, Scikit-learn, Tkinter, SQLite

Other: Poster Design, Video Editing

PROJECTS

Housing Price Prediction

Python, Pandas, Scikit-learn

- Developed a predictive model using Scikit-learn and Linear Regression, improving model performance by 15% through feature selection and outlier handling.
- Performed extensive data preprocessing and exploratory data analysis (EDA) to identify key price drivers.
- Evaluated model performance using Mean Squared Error (MSE) and R-squared (R^2) to ensure prediction reliability.

Amazon E-commerce Sales Dashboard

Power BI

- Engineered DAX measures and Power Query transformations to calculate real-time KPIs across 10,000+ rows of retail data.
- Identified a 12% seasonal sales trend in regional markets through visual trend analysis.
- Built KPIs including Total Revenue, Total Orders, and Return Rate; analyzed sales by region and product category to surface actionable business insights.

Hospital Management System

Python, Tkinter, SQLite

- Designed a desktop application to manage hospital operations including patient records, appointments, and billing.
- Streamlined provider workflows and improved administrative efficiency through automated data management.
- Implemented a user-friendly GUI using Tkinter for ease of access by medical staff.

Python Voice Assistant (AI Project)

Python, OpenAI API, SpeechRecognition

- Developed an intelligent voice assistant using Python with speech recognition and text-to-speech capabilities.
- Integrated AI-powered command processing, web search, application control, weather updates, and task automation.
- Used libraries such as SpeechRecognition, pyttsx3, OpenAI API, pywhatkit, Wikipedia, and automation modules to build a hands-free assistant.

CERTIFICATION

Nano Degree in Data Science — Imagecon Academy Pvt Ltd

- Completed 2+ industrial projects with daily assessments in Python, SQL, and Data Science.
- Applied a systematic, result-oriented approach to solving real-world data challenges.

EDUCATION

Bachelor of Computer Science, Muthayammal College of Arts and Science

2022 – 2025

CGPA: 5.9 / 10
